### **DETAILED ACTION**

1. The Examiner has carefully considered Applicant's amendments and remarks filed on 6/17/2003. Applicant's amendments to claim 1 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn.

### ***Response to Amendment***

4. Claims 1-8, 10-32, 39, 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Altieri (US 5153037), substantially for the reasons set forth in section 3 of Paper No. 10, together with the following additional observations.

It is noted that newly amended claim 1, lines 5-7, now recites in part "the foamed partly-finished product has a closed cell morphology in which the cells are substantially non-communicating with one another"

With respect to Applicants' response arguing that "the expanded products of Altieri have a poor relatively open cell structure and are brittle and easily crushable if a starch is used containing less than 45% amylose ..." (Remarks, page 11, third and bottom paragraphs), the Examiner notes that Applicants appear to have acknowledged that with a suitable amount of amylose, Altieri's expanded products perform satisfactory; further, a suitable amount of amylose limitation is not recited in claim 1. As such, Altieri's teachings clearly read on the instantly claimed invention.

Art Unit: 1771

With respect to Applicants' amendment to recite a closed cell morphology in claim 1, the Examiner notes that Altieri expressly teaches a closed-cell structure as well (Abstract). As such, the prior art rejection over Altieri is still deemed proper.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S Chang whose telephone number is 703-605-4296. The examiner can normally be reached on 8:30 - 5:00.
